APSC 200 P2: Week 6 Outline

Department of Mathematics and Engineering
Queen's University

June 5, 2019

1　Objectives

The main objectives of this week are listed below.

1. Complete any remaining tests or code modifications required for algorithm function or design optimization.

2. Complete Final Report. Be sure to check with marking rubric for final report to ensure your report covers all the required areas.

   (a) Items from Proposal Report
   (b) Design Solution
   (c) TBL Analysis
   (d) Economic Analysis

3. Complete Final Presentation. Check with the marking rubric for the final presentation to ensure that your presentation hits the required points.

2　Lectures and Workshops

There is one lecture and two workshops scheduled for this week. This weeks lecture is teaching skills that will be required to effectively translate the deployment algorithm into MATLAB code.

3　Deliverables

This weeks deliverables are:

1. Final Report (due ...)

2. Final Presentation (due ...)
